

Financial and Compliance Excellence

"Just weeks after implementation across our 21 facilities, Picis LYNX E/Point enabled us to increase net revenue by nearly \$9 million by improving charging accuracy, efficiency and compliance. Like Picis, we believe in implementing technologies that merge clinical and financial operations of our hospital – and most significantly, in the ED, where the cost and care is most intense."

-Reggie Allen, RN BSN
System Director, Quality and Clinical Operations
- CHRISTUS Health

CHRISTUS Health
